Uttara 10, Dhaka, Bangladesh

CAREER OBJECTIVE

- Developed and delivered multiple production-ready applications with real-time chat, secure payment integration, social authentication, and offline data support. Contributed to feature planning and technical design, mentored junior developers, and worked closely with backend engineers to build efficient and scalable APIs.

PROJECTS

Mirzajong Tothho Seba | Project link

January 2025 – Present

- Designed a modern, interactive UI with carousel, animations, icons, SVGs, and GIFs. Integrated Firebase (Firestore, Remote Config, Notifications) and OneSignal for real-time chat and updates. Implemented state management using Provider, local storage via SharedPreferences, and media handling (Image Picker, File Sharing, URL Launcher).
- Delivered a production-ready app supporting offline usage, real-time updates, and seamless UX.
- **Technologies:** Flutter, Dart, Firebase, Provider, OneSignal, SharedPreferences, Image/File handling.

E-commerce Application | Project link

November 2024 – Present

- Developed a product catalog with images, descriptions, and prices. Implemented shopping cart, user authentication (PIN login), and order management. Builta responsive UI with shimmer effects and SVG icons.
- Created a fully functional, mobile/desktop adaptable e-commerce prototype that supports secure user login and smooth shopping experience.
- **Technologies:** Flutter, Dart, HTTP APIs, Shimmer, SVG Icons, Provider for state management.

Task Manager | Project link

September 2024 – Present

- Built a task management app with creation, organization, prioritization, deadline reminders, and progress tracking. Integrated collaborative features.
- Improved task tracking and productivity for users, with offline and real-time updates.
- **Technologies:** Flutter, Dart, SharedPreferences, Image Picker, HTTP APIs, Provider.

Student Card | Project link

2025

- Developed an offline-first student ID management application enabling users to create, update, delete, and manage student records locally. Implemented structured data models using Hive with TypeAdapters and ensured efficient state updates for smooth UI performance.
- Delivered a lightweight, fast-performing application that works fully offline without backend dependency, ensuring reliable data persistence and seamless user interaction.
- **Technologies:** Flutter, Dart, Hive, Hive TypeAdapter, Local Storage Architecture, Responsive UI Design.

AREA OF INTEREST

Flutter | Machine Learning Engineer | App developer

TECHNICAL SKILLS

Problem Solving | Competitive Coding | Basics Of Data Structures | Basics Of Machine Learning

PERSONAL SKILLS

Self Starter | Flexible&Adaptable | Leadership | Communication
